

LONG SHANK RANGE - SYNOPSIS

Introduction:

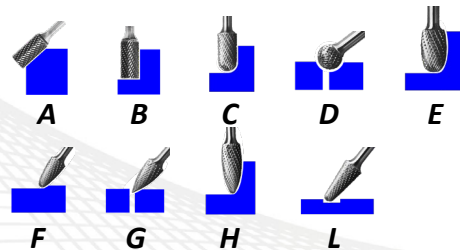

- Specifically developed range for those difficult to reach deburring applications

Features & Benefits:

- Additional overall length offers:
 - Improved application access
 - Greater manoeuvrability than a standard bur
 - Maintaining stock removal
 - Production output
- CNC machined - high consistent quality
- Manufactured to strict quality control standards - incorporates 100% inspection of brazed joints
- Combination of ATA air tool with Long Shank Range - gives a guaranteed smoother grinding operation

Range Details:

- Available in Solid & Brazed construction
- Available in Double & Single Cut
- 9 shapes available

- Maximum 15,000rpm operating speed

Industry target:

- Automotive
- Railway
- Foundries
- Die & mold
- Power Generation

Applications

- Ideal for difficult to reach applications on a wide range of materials
e.g. steels & cast irons
